ABHIRAM ROTE

Java Backend Developer | Spring Boot | REST APIs | Hibernate/JPA | SQL | GenAI (RAG)

Hyderabad, India | abhiramrote@gmail.com | +91 72869 51917 | linkedin.com/in/abhiramrote | github.com/abhiramrote

PROFESSIONAL SUMMARY

Java Backend Developer with 2 years of experience building production REST APIs and backend services using Java, Spring Boot, Spring Security, JPA/Hibernate, and SQL databases (MySQL, SQL Server, PostgreSQL). Strong in layered architecture, JWT authentication, validation, exception handling, and query optimization. Also built enterprise GenAI applications using Python, Flask, RAG, ChromaDB, and Azure OpenAI GPT-4o. 600+ LeetCode problems solved.

TECHNICAL SKILLS

Languages: Java, SQL, Python, JavaScript

Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, RESTful APIs, JWT, Flask

Databases: MySQL, PostgreSQL, SQL Server, JPQL, Query Optimization, Indexing

Core Concepts: OOP, Collections, Multithreading, JVM, SOLID, Design Patterns, DTO, Exception Handling

Tools: Git, GitHub, Maven, Postman, Docker

GenAI: LLMs, RAG, ChromaDB, Azure OpenAI, Semantic Search, Multi-Agent Workflows

DSA: 600+ LeetCode Problems

EXPERIENCE

Accenture – Analyst Software Engineer (Java Backend) Oct 2024 – Present

Hyderabad, India

- Built 10+ production REST APIs in Java and Spring Boot for an enterprise complaint management system, adding server-side validation that eliminated duplicate-submission errors.
- Optimized JPA/Hibernate entity mappings and MySQL queries through indexing and fetch-strategy tuning, reducing query response time by ~20% across 3 backend modules.
- Designed layered architecture (Controller, Service, Repository) with centralized exception handling via @ControllerAdvice, improving API consistency and maintainability.
- Developed an enterprise AI assistant using Python, Flask, RAG, ChromaDB, and Azure OpenAI GPT-4o for document retrieval, contextual Q&A, validation workflows, and report generation.
- Built multi-agent AI capabilities integrated with REST API data, enabling semantic document search and automated validation workflows for internal applications.

Freelance – Backend & Web Developer Nov 2025 – Present

Hyderabad, India

- Deployed sigmation.in, a production React website for industrial clients including Samsung, Indian Railways, and Asahi India Glass, with SEO optimization and live deployment.
- Developing a Spring Boot AC services booking platform with REST APIs for appointment scheduling, role-based access control, and automated email confirmations via JavaMail/SMTP.

PROJECTS

Order & Workflow Management System *Java, Spring Boot, Spring Security, JWT, JPA/Hibernate, MySQL*

- Architected a backend with JWT stateless authentication, USER/ADMIN role-based access control, transactional order workflows, and paginated product APIs.
- Implemented DTOs, input validation, custom exception handling, and service-layer business rules using clean layered architecture and SOLID principles.
- Designed and tested REST endpoints using Postman, with persistence through Spring Data JPA/Hibernate.

SmartPlant AI (SPAI) *Python, Flask, Azure OpenAI GPT-4o, RAG, ChromaDB*

- Built an enterprise AI assistant for retrieval and question answering over engineering documents using RAG, vector search, semantic retrieval, and GPT-4o.
- Implemented multi-agent workflows for document validation, analysis, and report generation.

EDUCATION

Rajiv Gandhi University of Knowledge Technologies (RGUKT), Basar Jul 2020 – May 2024

B.Tech – Electronics and Communication Engineering

CERTIFICATIONS & TRAINING

Programming in Java – NPTEL, IIT Madras | Backend & DSA – Bosscoder Academy | Complete Interview Preparation – GeeksforGeeks
